

A good first impression

Personal websites

Nathaniel Budijono

SASE Labs UMN

February 1, 2021

(Start recording!)

- Why make a personal site?
 - A blog
 - Your resume + more!
 - Stand out in the age of online applications
- Why GitHub Pages?
- It's free
- Why Hugo?
 - It's easy 'cause **Markdown is easy**
 - It works well with GH Pages
 - We use it for **SASE Lab's website**
 - I use it for my personal website

Before we begin

Do the pre-workshop stuff (if you want to follow along)

- Create a GitHub account
- Install git
- Programming interfaces
 - VSCode
 - Sublime
- Install Hugo and its dependencies
- Pick a theme

Nathaniel shows his screen

Deploying to the interwebs

- See [this](#) for help
- You should have your site live on the internet at `https://your-github-username.github.io`
- If you buy a domain name, you can use it instead
